

IT Acceptable Use Contract

The IT equipment at UTC Plymouth is provided and maintained for the benefit of all students, teachers, staff, parents and visitors. We ensure that all of our users have good access to IT facilities and in return we require that these facilities are used and treated responsibly.

IT is an essential part of learning. However, access to UTC Plymouth IT remains a privilege, not a right; inappropriate use will result in that privilege being withdrawn at the discretion of the Senior Leadership Team or the IT Manager.

Please read this document carefully before signing and returning the last page to UTC Reception for the attention of the IT Manager.

Facilities

- Please do not eat or drink while using the IT facilities.
- You are required to use the resources carefully and have awareness of your safety and the safety of others. Do not do anything that may cause damage to yourself, others or the equipment.
- You are responsible for ensuring that you are using the resources according to the Government's standard for the display screen equipment at work. If you think that the available resources may be inadequate, please inform your line manager/teacher immediately.

Equipment

- Do not change or attempt to change installed software on the systems.
- Do not access, or attempt to access, areas of the network you are not authorised to access.
- Do not download or bring into UTC Plymouth any software that is not approved by the IT Department.
- Do not alter or attempt to alter any settings, software or hardware on the systems.
- Damaging, disabling or otherwise harming any of the equipment or intentionally wasting resources may result in your access to our resources being temporarily or permanently removed. Deliberate or careless damage to the systems, if found by the Senior Leadership Team, will result in you (or your parents in the case of students) being charged for the cost of repair.
- Do not attempt to unplug any of the cables associated with the computers unless you have been told to do so. Pulling data and power cables causes damage to the network and the equipment, and should this cause damage you will be charged.

Security and privacy

- Always protect your work by keeping your password to yourself; do not share your password with anyone. It is recommended that you do not use easy to guess passwords; you will be required to use a minimum level of password complexity when you set your password.
- Use of any other user's account is strictly forbidden.
- Do not disclose or share personal information about yourself or others when online.
- Do not take or distribute images of anyone without their prior written permission.

- Respect other computer users and do not harass, harm, offend or insult them. Respect other's work and property and do not access, copy, remove or otherwise alter any other user's files without the owner's knowledge and permission.
- To protect yourself and the systems, you should respect the security of the computers. Attempting to bypass or modify the security settings may put your work and others at risk.
- Do not save or use files on any part of the network that may infringe copyright law.
- Staff may review your files and communications at any time to mark your work and ensure that you are using the system responsibly.
- UTC Plymouth retains the right to delete any files deemed inappropriate at any time without prior warning.

Internet

- You should access the Internet only for educational purposes or for college authorised/supervised activities. Recreational use is allowed at the college when authorised. However, online auctions, online financial transactions and gambling remain forbidden.
- You should only access suitable material – using the internet to obtain, download, send, print, display or otherwise transmit or gain access to materials which are unlawful, obscene or abusive is not permitted. You must respect the work and ownership rights of people outside the college, as well as other students or staff. This includes abiding by copyright laws.
- You must not (unless you have permission) make large downloads or uploads, or stream media that might take up internet capacity and prevent other users from being able to carry out their work.
- People you contact on the Internet are not always who they seem. Always ask a parent/guardian or teacher to go with you if you need to meet someone who you only know from the Internet or via email.
- You will immediately report to your teacher or to the Child Exploitation & Online Protection Centre (CEOP), any unpleasant or inappropriate material or messages or anything that makes you feel uncomfortable when you see it online.

Email

- You will not open any attachments to emails, unless you know and trust the person / organisation that sent the email, due to the risk of the attachment containing malware.
- Be polite and appreciate that other users might have different views from your own. The use of strong language, swearing or aggressive behaviour is as anti-social on the internet as it is on the street
- All emails are scanned for illegal attachments and content, any use of strong language, swearing or aggressive behaviour will be detected and then forwarded to staff to be dealt with accordingly.
- If you receive an email containing material with violent, dangerous, racist, or inappropriate content, always report such messages to a member of staff. The sending of an email containing content likely to be unsuitable for children or colleges is strictly forbidden.

AI

- Artificial Intelligence - AI can serve as a valuable supplement to the curriculum, providing additional resources, explanations, and opportunities for critical thinking exercises. In coding courses, students can interact with ChatGPT for coding suggestions and debugging. Language learning can be enhanced through writing practice and conversations. Role-playing

scenarios simulate real-world situations, while ethical AI discussions foster awareness of AI-related issues. Collaborative projects, personalised learning experiences, and regular evaluations ensure adaptability to diverse educational needs.

At UTC we create a safe environment with clear guidelines that promotes responsible use of AI - it is important that AIs used as a resource and is not plagiarised.

The Agreement

UTC Plymouth monitors all aspects of the network, from personal files and emails to the internet and other resources. This is carried out by the IT Technicians to ensure your safety and the correct use of our resources and digital communication. By using our network, you agree to the conditions laid out in this document, and you accept that any resources used may be monitored and recorded as evidence in the case of inappropriate use.

You understand that if you fail to comply with this acceptable use policy agreement you may be subject to disciplinary action. This may include loss of access to our resources, detentions, suspensions, contact with parents and in the event of illegal activities - involvement of the police.

Actions following misuse of the Acceptable Use contract will be determined by the IT Department and the Senior Leadership Team. At any point they have the right to refuse or revoke access to the network resources. By signing this document, you are agreeing to the terms and conditions laid out in this Acceptable Use contract.

I agree to abide by the terms and conditions laid out in this Acceptable Use Policy
